FUTURE

2024 YOUNG SIRE CATALOGUE

A joint programme

LIC jersey NZ

Introduction

We proudly present this Jersey Future catalogue. We believe this bull team will contribute significantly to the Jersey population and the team provides un-matched value for breeders who support this programme.

The dams and the maternal lines behind these bulls continue to bring solid depth and performance with strong indexes for production, conformation, fertility and longevity.

This team delivers outstanding averages for gBW, fertility, Udder Overall, Capacity and Dairy Conformation.

A polled bull is offered for the second year following on from last years polled inclusion.The polled bull also offers genetic outcross diversity via his Sire Thornlea Amps Tikka-P featuring USA and Australian sires.

We encourage the use of polled bulls within herds and would welcome polled bulls into our team. There is increasing investment and demand for polled within New Zealand.

Breeders using this bull team will have the opportunity to milk the first daughters of the next generation of top sires.

We advocate the use of diverse genetics within breeding programs. We anticipate the genetically diverse young bulls will come via an overseas paternal or maternal grand sire.

This year there has been an increase in semen price after a long period of keeping the price to a minimum. The funds associated with semen sales go straight back to JerseyNZ, funding valuable programs and supporting services.

We believe Jersey Future semen is unmatched for value.

We thank all the breeders who have supported Jersey Future.

Please support Jersey Future - Your Future

JerseyNZ Genetics Committee

2024 PSS & Alpha Bull Teams

Congratulations to the breeders of these outstanding bulls.

Following on from previous success we are delighted to announce the following successful bulls named in 2024 PSS bull teams or ALPHA bull teams:

Tironui Montage, Williams Brisbane Frenzy, Lynbrook Trigg Bravado, Lynbrook TN Te Anau, Williams Banff Substance, Glanton CMM Burton, Paspalum OI Limelight

Jersey Future Incentives

- *Free TOP for all Jersey Future sired heifers where all two year olds are inspected in the herd.*
- *50% discount off the cost of registrations for all Jersey Future sired heifers.*
- *One year senior subscription free to any new member purchasing 70 or more straws of Jersey Future semen.*

YOUR CHOICE

INDIVIDUAL

INDIVIDUALLY SELECTED

$14.50 +GST

- Straws per breeder capped at 50 per bull either individual or pack (right of Jersey NZ to limit purchase to ensure spread across minimum number of herds required). Breeders may not order their own bulls.
- Semen must be used to generate genuine replacements
- No guarantee to be able to supply all bulls ordered.

Conditions of sale:

- Every purchaser must have a LIC participant code and is bound by the LIC Conditions and Service Rules that apply from time to time.
- The semen must be inseminated in the same season that it is purchased in.
- The semen is intended for use in breeding genuine replacements.
- In order to support the proving of these young sires, the resulting progeny should participate in at least four herd tests in each season, be TOP inspected and have any calving assistance, genetic defect or other type of health and trait recording carried out.
- The resulting progeny must be tagged in accordance with the requirements of the Biosecurity Act 1993 and the National Animal Identification and Tracing Act 2012, and the core data including the birth identification of the daughters is loaded into the Dairy Industry Good Animal Database (DIGAD) either via LIC or CRV Ltd as the herd record provider.

Terms & Conditions:

- A 50% deposit will be required for sales to any non-Jersey NZ members, invoiced when order made.
- Jersey NZ reserves the right to increase/decrease any prices depending on availability and other international conditions beyond our control.
- Jersey NZ takes every care to ensure the accuracy of information and pricing contained within this catalogue. We expressly disclaim all liability for errors or omissions of any kind whatsoever or for any loss, damage or other consequence which may arise from any person relying on information contained in this catalogue.
- The products provided in this catalogue are done so in accordance with Jersey NZ's standard terms and conditions a copy of which can be found at www.jersey.org.nz
- Semen from young bulls is available for Spring mating ONLY.
- Autumn calving orders are available for Jersey NZ members only where there is still semen available after all spring orders have been filled. Autumn calving orders are capped at 10% of of Spring Jersey Future orders, and a maximum of 20 straws per herd per bull. Autumn semen sales will only commence after 1 December.

LIC

Data Source 15/03/2024 | All gBW & gBV's are Genomic calculations from 15/03/2024

Jersey National Herd Averages

15/03/2024

These statistics are calculated by LIC. Production and TOP information includes all current cows in the national herd (ie. Animals signed up for herd testing with 80 or more numbered cows current in the herd aged over 490 days), whereas the calving difficulty gBV, which is a sire trait, is based on all enrolled bulls, with a gBW reliability of at least 60%, at least 20 herd tested daughters and at least one two-year-old daughter milking in the last five years.

Lynbrook Novak Fiordland

Breeder: Lynbrook Farm Ltd

gBW: 528 / 46

Data Source 15/3/2024

aeBW: 426 / 22

Data Source 15/3/2024

From the Lynbrook stud, Fiordland is an efficiency champion with great fertility and udder gBV's, and is one of the highest gBW Jersey Future bulls in the line-up. Sired by the high-ranking Thornwood Profit Novak-ET, Fiordland's dam is an E2 cow scoring 8 for both udder overall and dairy conformation. She is busy with her fifth lactation this year, and has consistently high production throughout all her lactations.

For the second year in a row, Jersey Future offers breeders a polled bull in the line-up, and a bull with very good udder gBV's. Another Lynbrook bull out of a great high production cow family, tremendous bulls feature in the pedigree with the likes of Degree and Goldie. On the sire line, the well-known Tancy family is making an impact.

Dam: Lynbrook Miss Goldie, V2

Boulder is one of the last Glanton-prefix bulls offered to Jersey Future and the end of an era for the great stud of Rob and Alison Thwaites. He is a half-brother of the 2023 Jersey Future bull Glanton CMM Burton. Once again, a top sire is available out of the well-proven Glanton B family, with cows having superior production featuring in his pedigree. His dam, Glanton Cobra Beatrix-ET, is a VG 86 high-index young cow with an exceptional PW and LWs.

Dam: Glanton Cobra Beatrix ET, VG86

Busybrook Lamar Bushwacker

Breeder: Henley Farming Company

gBW: 477 / 56

Data Source 15/3/2024

aeBW: 410 / 36

Data Source 15/3/2024

From the stable of Nathan & Amanda Bayne, Bushwhacker is a high fat gBV bull with good udders out of Upland Park Hoss Bloom. His sire Lamar is a bull with excellent farmer feedback and is still being used in the national herd. Good production and conformation traits are attributes for this cow family with a touch of overseas genetics in the back pedigree.

Dam: Upland Park Hoss Bloom, VG85

324206 Okura Julian Luger

Luger is bred by Brendan & Stacey White out of the well-proven Okura L family, and his grandam is also the dam of Lucca. The dam of Luger, Okura Goldies Lylla, is a tremendous cow with excellent production and a classification score of E2. Luger is a true all-rounder with good production, excellent fertility, capacity and udder overall.

Dam: Okura Goldies Lylla, E2

Williams Julian Isaiah

Breeder: Totara Dairy Ltd

gBW: 519 / 46

Data Source 15/3/2024

aeBW: 460 / 21

Data Source 15/3/2024

Isaiah is Williams-bred on the sire and dam side, and out of the Mary Williams stable. His dam is a great young cow. scoring VG 87 with a 9 for udder overall. Excellent production from the maternal line is a standout for Isaiah with PWs and LWs over 500. He has a slightly different pedigree with Zambezi and Favour prominent in the maternal line. On the sire side, the great bull Banff adds to the quality of the pedigree.

Dam: Williams Zambezi Ivy, VG87

Data Source 15/3/2024

This bull from Steve and Nina Ireland is stacked with great production bulls in the pedigree, including the likes of Favour, Trigger, Connacht and Bowie, and can help with some inbreeding challenges. His Trigger dam is an excellent producer, scoring VG 86. Brooklyn is bred out of the high-performance Lynbrook B family and good udders feature throughout the pedigree.

aeBW: 474 / 21

Data Source 15/3/2024

Havana, from the Hawthorn Grove stud of Ron and Jackie Monk on the West Coast, is a Bremen son with big production gBV's. He is bred out of a high-production Nucleus dam, and his E2 Trigger granddam scored a 9 for dairy conformation. High protein and good size are standouts for Havana.

Dam: Hawthorn Grove Helika JG, GP84

A joint venture programme

LIC jerseyNZ FUTURE

PROGRAMME SUCCESS

Young bulls selected by Jersey Future are all backed by productive cow families of high genetic merit, with good longevity. We can proudly announce that from previous crops seven bulls stand out from the programme and are available in 2024 Alpha nominated or the preliminary Premier Sires Teams. Some of these bulls have left outstanding daughters across the nation and are proving their high genetic merit.

By identifying young bulls with high potential and with the help of kiwi farmers, we're finding the sires of the future.

gBW/gBV are calculated by LIC

gBW/Rel

Using this bull at a gBW of $413 indicates that per 5t DM the replacements are expected to generate NZD $206 more net profit than using a sire with a gBW of 0.

The reliability of a sire is a measure of the amount of information behind the bulls gBW. The higher the reliability the less movement expected with his gBW.

Liveweight

A gBV of -52 kg indicates by using this sire over the average cow in New Zealand his daughters are expected to have a mature liveweight -26kg heavier than the base cow of 500 kg. Because Breeding Values (gBV) are calculated across breed you would expect a Holstein Friesian to have a much higher (positive) gBV for liveweight and you would expect Jerseys to have a lower (negative) gBV.

Milk

A gBV of -276 litres indicates the bull will produce daughters which on average will produce -138 litres more than the base cow per 5t of dry matter fed. Remember the gBV is across breeds so Jersey and Crossbred animals may show a negative gBV.

Somatic Cell Count

A useful approximation for farmers to note, is that a difference between two sires of 0.5 in breeding value equates to a difference in expected daughter performance of 35,000 bulk milk count. The lower the SCC gBV the better as you want to reduce the bulk milk SCC.

Protein and Milkfat

A gBV of 41 kg indicates that the bull will produce daughters which on average, are genetically superior to the base cow by 20 kg per 5t dry matter consumed.

Fertility

A gBV of 2.9% indicates that 1.45% more daughters are expected to calve in the first 42 days of a herds calving period, compared to a bull of 0.

As an industry New Zealand has a tighter calving pattern than dairy industries worldwide. Highly fertile cows have been necessary to achieve this. It is generally accepted that the New Zealand base cow is far more fertile than any other countries base.

Functional Survival

The likely percentage of cows surviving to the next lactation independent of culling for low production or poor fertility (For example a bull with a gBV of 3.6% means, on average, we expect his daughters to have a 1.8% higher probability of surviving to the next lactation than a bull with a gBV of 0)

Shed Temperament

A gBV of 0.00 indicates that the bull will produce daughters which on average, are genetically the same as the base cow. (For example by using a bull with a shed temperament of 0.51 the raw score for his daughters on average is expected to be 6.28 + 0.25 = 6.5 from a linear score of 9).

Stature

Again as the gBV for a sire is comparing his progeny against the base cow which is across breed. Stature for Jerseys is usually negative and Holsteins are positive.

Calving Difficulty

A sires Calving Difficulty gBV compares the percentage of assisted calvings expected when he is mated to yearling heifers and cows, compared to a bull of 0.

Jersey Future Order Form 2024

TERMS – This Jersey Future Order Form is a contract between you, Jersey NZ and Livestock Improvement Corporation Limited in respect of the sale and supply of Jersey Future semen and your participation in the Jersey Future Proving Project. The following conditions apply:

- You must have a LIC participant code and are bound by the LIC Conditions and Service Rules. The LIC Conditions and Services Rules will apply to this contract, a copy of which can be found at www.lic.co.nz.
- The semen must be inseminated in the same season that it is purchased in and is intended for use in breeding genuine replacements.
- Semen can only be used in your own herd.
- In order to support the proving of these young sires, the resulting progeny should participate in at least four herd tests in each season, be TOP inspected and have any calving assistance, genetic defect or other type of health and trait recording carried out.
- The resulting progeny must be tagged in accordance with the requirements of the Biosecurity Act 1993 and the National Animal Identification and Tracing Act 2012, and the core data including the birth identification of the daughters is loaded into the Dairy Industry Good Animal Database (DIGAD) either via LIC or CRV Ltd as the herd record provider.
- This contract will be deemed as accepted by Jersey NZ and LIC upon supply of the semen to you.
